

ECCO Version 4 Release 2

[<https://dataverse.harvard.edu/dataverse/ECCOv4r2inputs>]

[doi:10.7910/DVN/7XYXSF]

- This dataset (<http://dx.doi.org/10.7910/DVN/7XYXSF>) provides the ECCO Version 4 Release 2 model initialization files:

tile*.mitgrid	grid variables (MITgcm input format)
bathy.bin	bathymetry
pickup*.data	initial condition
geothermalFlux.bin	geothermal heating (annual climatology)
runoff.bin	river runoff (monthly climatology)
xx_*.data	diffusivity anomaly fields
visc*.bin	viscosity anomaly fields
wt_ones*	settings for MITgcm/pkg/ctrl
smooth*	settings for MITgcm/pkg/smooth

- All contents are granted the CC0 Public Domain Dedication. Any materials (books, articles, conference papers, theses, dissertations, reports, and other such publications) created that employ, reference, or otherwise utilize the data (in whole or in part) gathered from deposited datasets should credit the source with the applicable data citation generated by Dataverse (found on the dataset page).

- Comments:

- These binary files can be read in Matlab using `read_bin.m` (http://mitgcm.org/viewvc/MITgcm/MITgcm_contrib/gael/matlab_class/gcmfaces_IO/) as part of the `gcmfaces` toolbox (see `gcmfaces.pdf` link provided below). They are also directly readable by the MITgcm when using the LLC90 setup to re-run the ECCO v4 ocean state estimate (see `eccov4.pdf` link provided below).
- 'ECCO Version 4 Release 2' is a global ocean state estimate that covers the period from 1992 to 2011 (Forget et al. 2015, 2016). It was produced on behalf of the ECCO consortium (<http://ecco-group.org/>) with major support provided NASA's Physical Oceanography Program. General documentation of the 'ECCO Version 4 Release 2' dataverse and all included datasets can be found at <https://dx.doi.org/10.7910/DVN/ODM2IQ> (see `README.pdf` in that dataset).
- The formatting, online publishing, and archiving of the ECCO V4 R2 dataverse and datasets have benefited from guidance that was graciously provided by the MIT Libraries Data Management Services (<http://libraries.mit.edu/data-management/>). At time of writing the contents listed above can alternatively be downloaded from ftp://mit.ecco-group.org/ecco_for_las/version_4/release2/.

- Software:

- The ECCO V4 R2 files were produced using the 'checkpoint64u' versions of the general circulation model (MITgcm and ECCO v4 settings) and Matlab analysis toolboxes (`gcmfaces` and `MITprof`). These software versions are available at http://mitgcm.org/download/other_checkpoints/ and http://mit.ecco-group.org/opensap/ecco_for_las/version_4/checkpoints/contents.html
- The up to date software documentations are available at http://mitgcm.org/public/r2_manual/latest/online_documents/manual.pdf, http://mitgcm.org/viewvc/*checkout*/MITgcm/MITgcm_contrib/gael/verification/eccov4.pdf, and http://mitgcm.org/viewvc/*checkout*/MITgcm/MITgcm_contrib/gael/matlab_class/gcmfaces.pdf

- Contact Us:

- questions regarding the ECCO model set-up, grid, software, or files should be addressed to either `ecco-support@mit.edu` (please subscribe via <http://mailman.mit.edu/mailman/listinfo/ecco-support>) or `mitgcm-support@mitgcm.org` more generally (please subscribe via <http://mitgcm.org/mailman/listinfo/mitgcm-support>).
